

# SX Prevent Instructions

Browse to <https://sxprevent.com/>

Click on Authorized Personnel.

Create a login and password the first time.

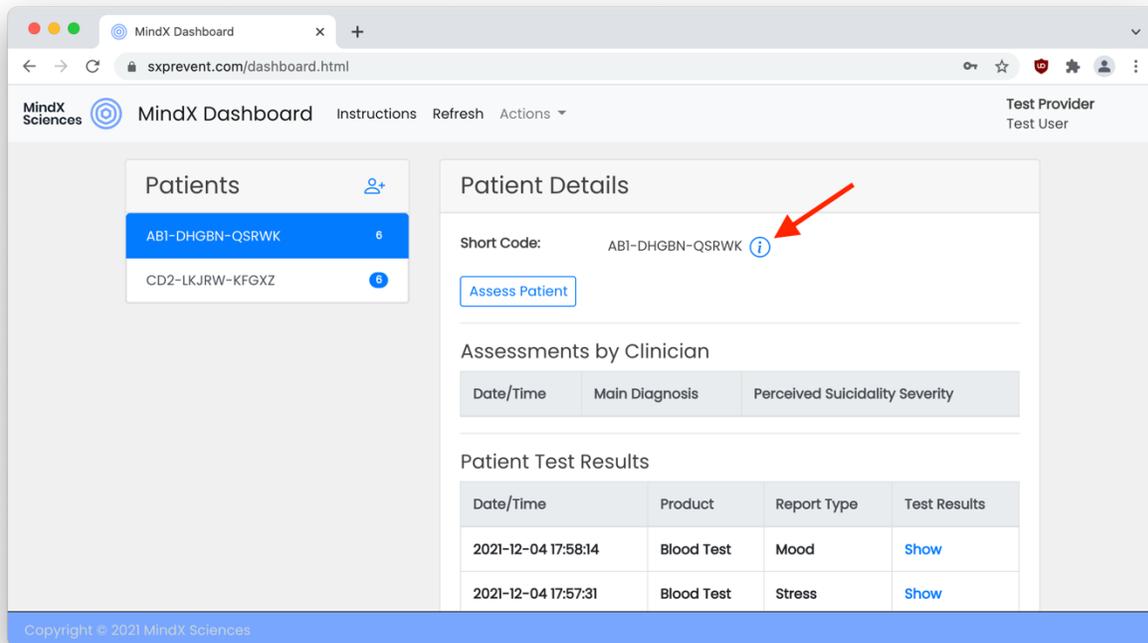

Enter credentials and click “Sign in”.

On the left is the list of participants. Participants that have test results that have not yet been reviewed have a blue pill with a number indicating how many test results have not yet been reviewed.

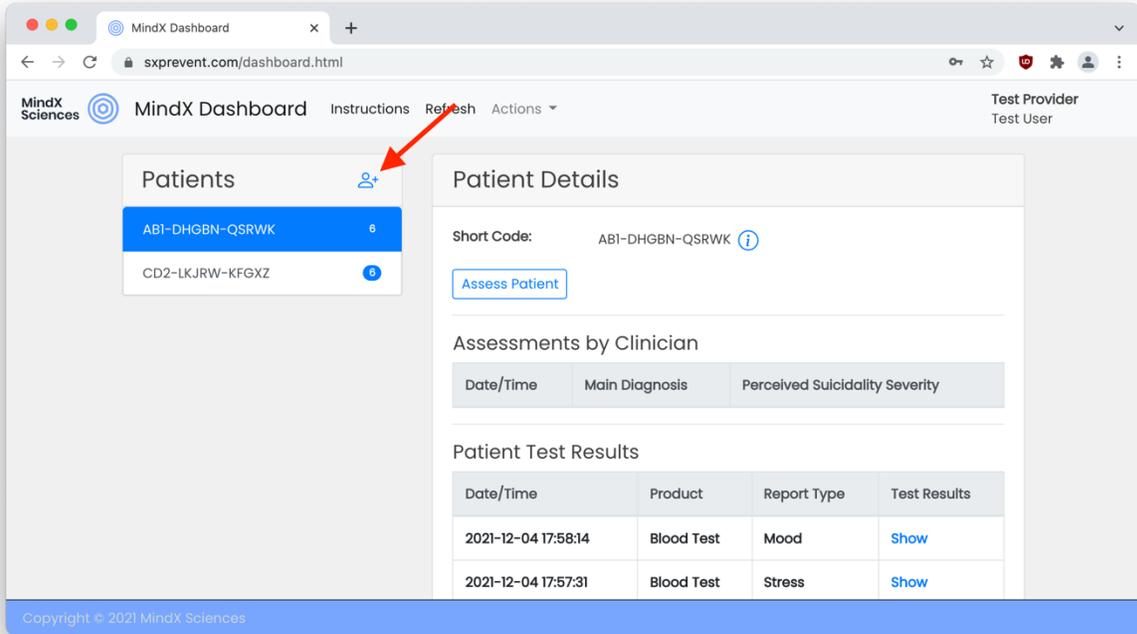

Selecting a patient will show their test results on the right.

Review the Participants’ test results by clicking on the ‘Show’ link.

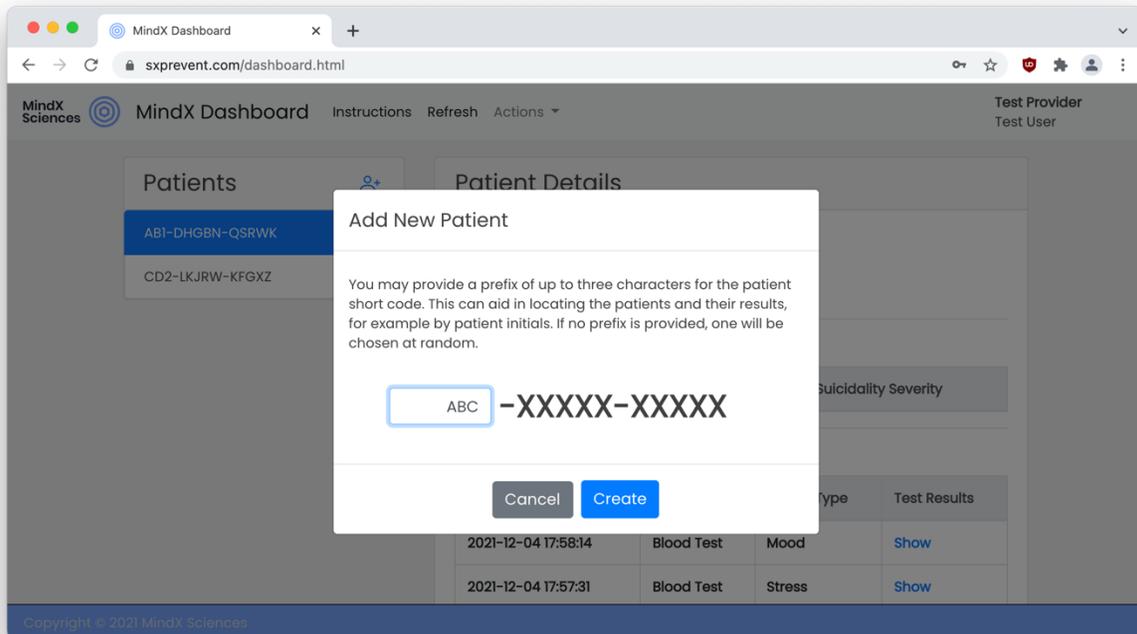

To send link for SXPrevent to Participant, click on the “i” icon.

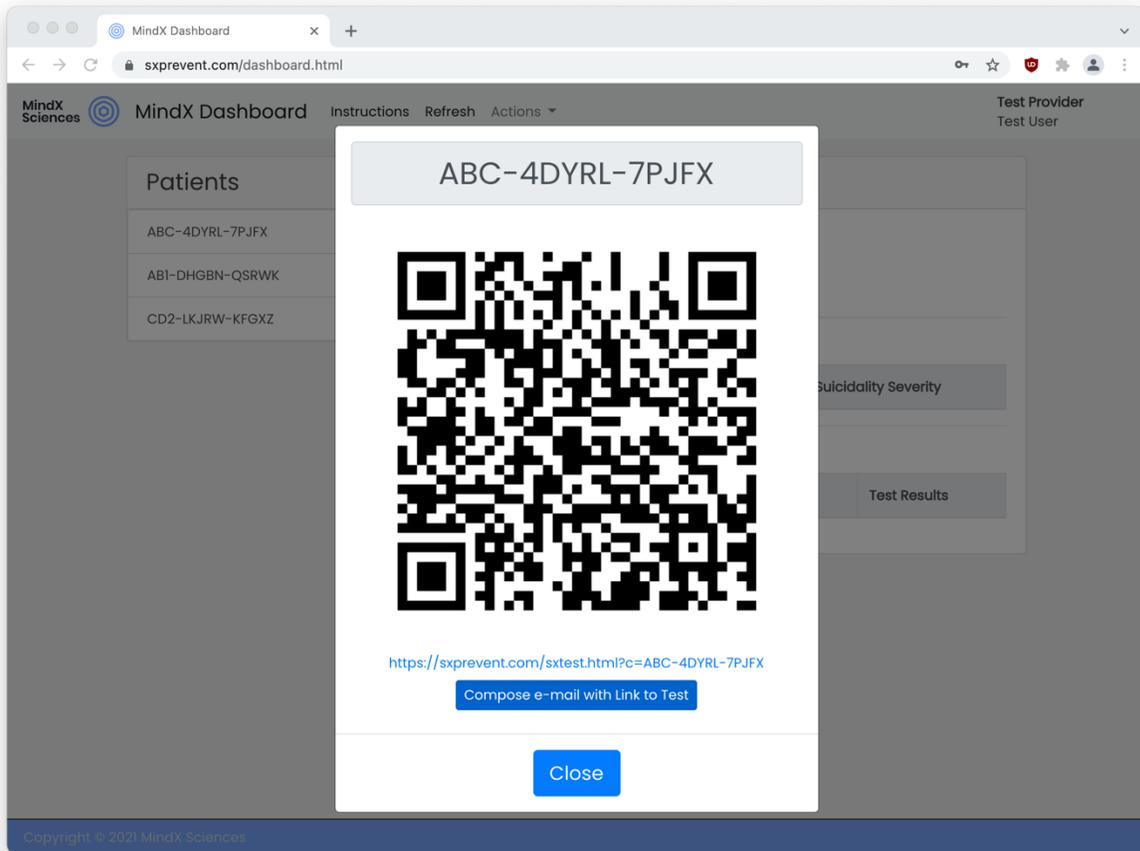

## To add a new Participant

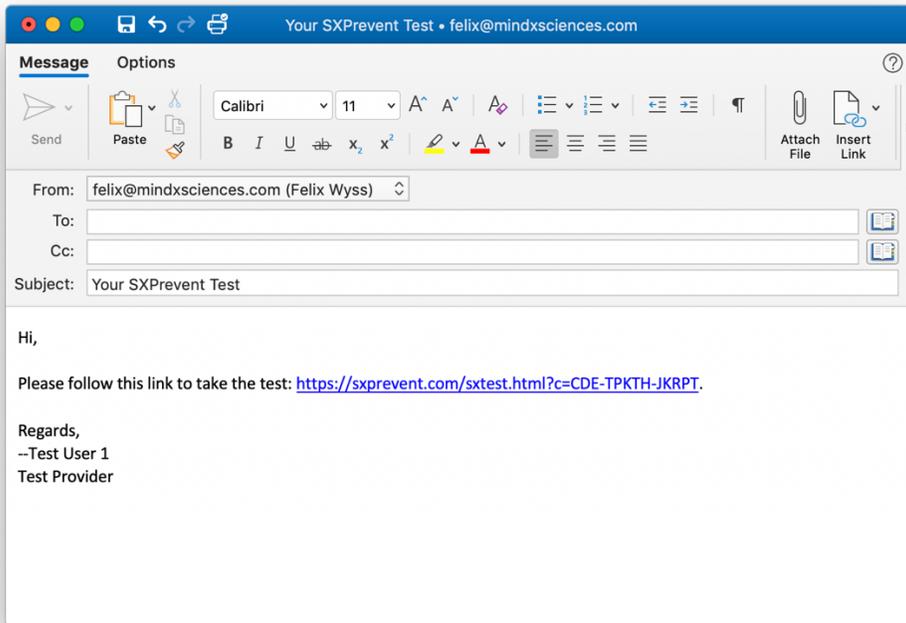

## Add participant's initials in front of the code for easier identification:

Clicking “Create” creates a new Participant record and shows the code and test link:

Send link to Participant, for example by clicking “Compose e-mail with Link”. The system email client should launch with a pre-filled subject line and body template:

Set e-mail address of Participant and edit/change body as appropriate.  
After Participant completes the test, their identifier will show a blue dot in the dashboard.  
Clicking on show will show you their SXPrevent test results.
